

TECH TIP: ENTRY STEP (Keeping Your Step Setup Looking Nice)

Rotates left or right to release
latches, allowing stairs to be stowed

Mounted on both sides of steps these
rotate the steps to the "Lip" of the
frame when in the up/stowed position.
Both

1. Rotate "Latch Handle" to retract the frame latches
2. Gently lift stairs fully upright until the stopper touches the frame lip
3. Release "Latch Handle"
